INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference P800852/WO/1	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/EP2003/011694	International filing date (<i>day/month/year</i>) 22 October 2003 (22.10.2003)	Priority date (<i>day/month/year</i>) 11 December 2002 (11.12.2002)
International Patent Classification (IPC) or national classification and IPC G01H 3/00		
Applicant DAIMLERCHRYSLER AG		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 5 sheets, including this cover sheet.
- ☒ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 5 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 21 May 2004 (21.05.2004)	Date of completion of this report 21 December 2004 (21.12.2004)
Name and mailing address of the IPEA/EP	Authorized officer
Facsimile No.	Telephone No.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP2003/011694

I. Basis of the report

1. With regard to the elements of the international application:*

☐ the international application as originally filed

☒ the description:

pages 1-17, as originally filed
pages, filed with the demand
pages, filed with the letter of

☒ the claims:

pages, as originally filed
pages, as amended (together with any statement under Article 19
pages, filed with the demand
pages 1-21, filed with the letter of 04 March 2004 (04.03.2004)

☒ the drawings:

pages 1/2-2/2, as originally filed
pages, filed with the demand
pages, filed with the letter of

☐ the sequence listing part of the description:

pages, as originally filed
pages, filed with the demand
pages, filed with the letter of

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
☐ the language of publication of the international application (under Rule 48.3(b)).
☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority in written form.
☐ furnished subsequently to this Authority in computer readable form.
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages
☐ the claims, Nos.
☐ the drawings, sheets/fig

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/E 3/11694

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-21	YES
	Claims		NO
Inventive step (IS)	Claims	1-21	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-21	YES
	Claims		NO

2. Citations and explanations

Reference is made to the following documents:

D1: DE 31 33 107 A

D2: PATENT ABSTRACTS OF JAPAN, Vol. 017, No. 541
& JP 05 147481 A

1. The invention relates to a device and method for recording and reproducing noises, more particularly for acoustic component analysis in motor vehicles.
2. Document D1, which is considered to be the prior art closest to the subject matter of claim 1, discloses a device as defined in the preamble of claim 1.

The subject matter of claim 1 differs from the device known from D1 in that the signal processing means allows real-time processing and real-time forwarding of the generated electrical signals, and the two sound transducers allow binaural real-time generation of sound signals, and also in that the signal processing means has filter equipment to exclude frequency ranges of the recorded noise, such that frequency ranges which are fixed or variable over time can be excluded.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

3. This distinguishing feature solves the problem of how to improve a device for recording and reproducing noises, more particularly for acoustic component analysis. The claimed solution is not disclosed in document D2, and a combination of the teachings of D1 and D2 would not lead to the subject matter of claim 1. The subject matter of claim 1 can therefore be regarded as inventive (PCT Article 33(3)).
4. The subject matter of claims 11 and 19 is also novel and inventive (PCT Article 33(2) and (3)) because it relates to a method and a set of headphones with features corresponding to those of claim 1.
5. The dependent claims also meet the PCT requirements in respect of novelty and inventive step.
6. There are no doubts regarding the industrial applicability of the subject matter of claims 1 to 21.
